

Black Dahlia (Live)

Tech | Hospitality Rider

Show

Length of show is 30 to 45 minutes (or as agreed upon with Black Dahlia and promoter).

Adequate stage floor space for Black Dahlia to perform.

Artist and only those designated by the artist to be on stage or in performance zone during the show.

Good ventilation of air conditioning within the venue and if not possible, a fan needs to be present on the side of the stage and facing the artist.

Adequate safety from rowdy patrons during set, and there must be a safe space for performer to immediately hydrate and rest after performing.

Soundcheck

Minimum of 1 hour for set-up and sound-checking is needed. When possible, the venue is to remain free of the general public during this time.

Sound technician must be present and available during sound-check and throughout the set.

Requirements

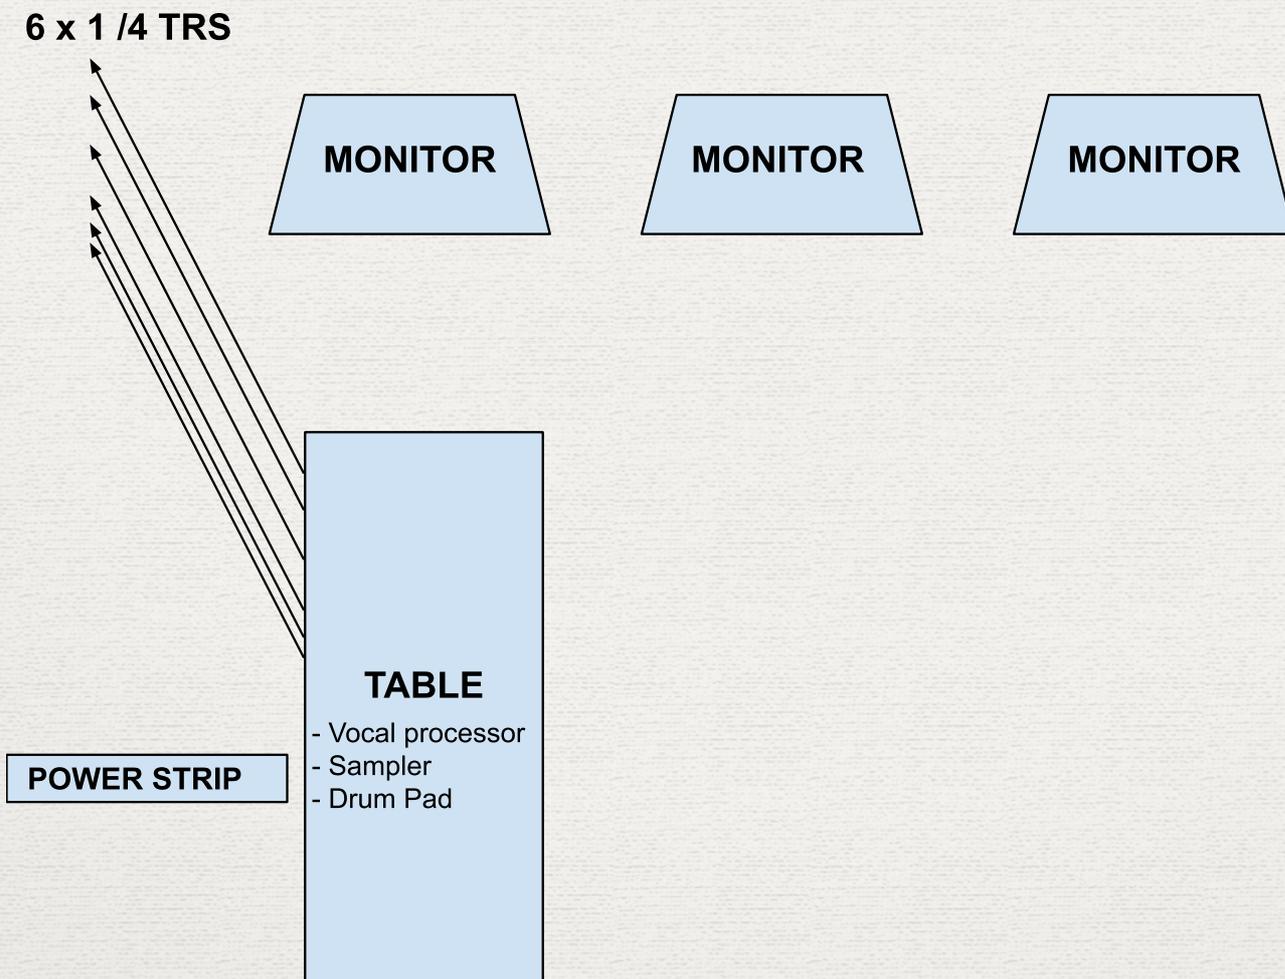

3 x high quality monitoring speakers on stage. Floor wedges facing the artist to control feedback.

1 x secure table for live equipment. Table space of 2ft x 4ft is needed. Please ensure the table is reasonably tall.

6 x 1/4 TRS line inputs to FOH mixing console - 2 for vocal effects processor, 2 for sampler, and 2 for drum pad (all stereo)

1 x good power strip to properly power and support x3 pieces of music gear

Stage Plot

Hospitality
